1. Package Contents

Thank you for purchasing PLANET 8-/16-/24-Port 10/100TX 802.3at PoE + 2-Port Gigabit TP/SFP Combo Managed Ethernet Switches, FGSD-1008HPS, FGSW-1816HPS, FGSW-2624HPS and FGSW-2624HPS4.

"Managed PoE Switch" mentioned in this quick installation guide refers to the above switches.

Open the box of the Managed PoE Switch and carefully unpack it. The box should contain the following items:

- The Managed PoE Switch x 1
- Quick Installation Guide x 1
- RS232 to RJ45 Console Cable x 1
- Rubber Feet x 4
- Two Rack-mounting Brackets with Attachment Screws x 1
- Power Cord x 1
- SFP Dust-proof Caps x 2

If any item is found missing or damaged, please contact your local reseller for replacement.

2. Requirements

- Workstations running Windows 10/XP/2003/Vista/7/8/2008, MAC OS X or later, Linux, UNIX, or other platforms are compatible with TCP/IP protocols.
- Workstations are installed with Ethernet NIC (Network Interface Card)
- Serial Port Connection (Terminal)
 - > The above Workstations come with COM Port (DB9) or USB-to-RS232 converter.
 - > The above Workstations have been installed with **terminal emulator**, such as Hyper Terminal included in Windows XP/2003.
 - Serial cable -- one end is attached to the RS232 serial port, while the other end to the console port of the Managed PoE Switch.

Ethernet Port Connection

- > Network cables -- Use standard network (UTP) cables with RJ45 connectors.
- > The above PC is installed with Web browser and JAVA runtime environment plug-in.

It is recommended to use Internet Explorer 8.0 or above to access the Managed PoE Switch. If the Web interface of the Managed PoE Switch is not accessible, please turn off the anti-virus software or firewall and then try it again.

3. Starting Web Management

The following shows how to start up the **Web Management** of the Managed PoE Switch. Note the Managed PoE Switch is configured through an Ethernet connection. Please make sure the manager PC must be set to the same **IP subnet address**.

For example, the default IP address of the Managed PoE Switch is **192.168.0.100**, then the manager PC should be set to **192.168.0.x** (where x is a number between 1 and 254, except 100), and the default subnet mask is 255.255.255.0.

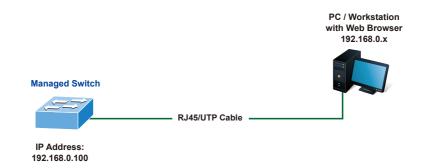

Figure 3-1: IP Management Diagram

The following web screen is based on the FGSW-2624HPS; the display of the FGSW-2624HPS is the same as those of the FGSD-1008HPS, FGSW-1816HPS and FGSW-2624HPS4.

3.1 Logging in to the Managed PoE Switch

- Use Internet Explorer 8.0 or above Web browser and enter IP address
 http://192.168.0.100
 (the factory default IP address or the one that you have just changed in console) to access the Web interface.
- 2. When the following dialog box appears, please enter the default user name and password "admin" (or the password you have changed via console). The login screen in Figure 3-2 appears.

Default IP Address: 192.168.0.100

Default Username: **admin** Default Password: **admin**

Figure 3-2: Login Screen

3. After entering the password, the main screen appears as Figure 3-3 shows.

Figure 3-3: Web Main Screen of Managed PoE Switch

The Switch Menu on the top and left of the Web page lets you access all the commands and statistics the Managed PoE Switch provides.

Figure 3-4: Switch Menu

Now, you can use the Web management interface to continue the Switch management or manage the Switch by console interface.

Please refer to the user's manual for more.

3.2 Saving Configuration via Web

To save all applied changes and set the current configuration as a startup configuration, the startup-configuration file will be loaded automatically across a system reboot.

1. Click the Save icon on the top Switch Menu bar.

Figure 3-5: Save Config -- Hot key

4. Terminal Setup

To configure the system, connect a serial cable to a COM port on a PC or notebook computer and to RJ45 type of serial port of the Managed PoE Switch.

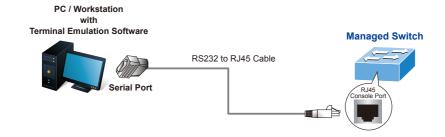

Figure 4-1: Console Connectivity

A terminal program is required to make the software connection to the Managed PoE Switch.

- 1. Run terminal program on the OS.
- 2. When the following screen appears, make sure that the COM port should be configured as:

♦ Baud: 115200

◆ Data bits: 8

◆ Parity: None

♦ Stop bits: 1

◆ Flow control: None

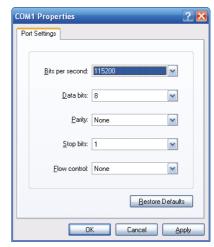

Figure 4-2: COM Port Configuration

4.1 Logging on to Console

Once the terminal is connected to the device, power on the Managed PoE Switch and the terminal will display "running testing procedures". Then, the following message asks to log in user name and password. The factory default user name and password are shown as follows and the login screen in Figure 4-3 appears.

Username: **admin** Password: **admin**

Welcome to FGSW-2624HPS it is Thu Jan 1 08:01:11 UTC 1970

Figure 4-3: Console Login Screen

The user can now enter commands to manage the Managed PoE Switch. For a detailed description of the commands, please refer to the following chapters.

- 1. For security reason, please change and memorize the new password after this first setup.
- 2. Only accept command in lowercase letter under console interface.

4.2 Configuring IP Address

The Managed PoE Switch is shipped with default IP address shown below.

IP Address: **192.168.0.100**Subnet Mask: **255.255.25.0**

To check the current IP address or modify a new IP address for the Switch, please use the procedures as follows:

- Show the current IP Address
- 1. At the ">" prompt, enter "show ip".
- 2. The screen displays the current IP address as shown in Figure 4-4.

> show ip

IP Address: **192.168.0.100** Subnet Mask: **255.255.25.0** Default Gateway: **192.168.0.254**

DNS Server:

DHCP Client: Disabled

Figure 4-4: IP Information Screen

- Configuring IP Address
- At the ">" prompt, enter the following command and press <Enter> as shown in Figure 4-5.
 - > config ip address 192.168.1.100
 - > config ip submask 255.255.255.0

Figure 4-5: Configuring IP Address Screen

The previous command would apply the following settings for the Managed PoE Switch.

IP Address: **192.168.1.100** Subnet Mask: **255.255.25.0**

4. Repeat step 1 to check if the IP address has changed.

4.3 Storing Current Switch Configuration

At the ">" prompt, enter the following command and press **<Enter>**.

> save

Figure4-6: Saving Current Configuration Command Screen

If the IP is successfully configured, the Managed PoE Switch will apply the new IP address setting immediately. You can access the Web interface of the Managed PoE Switch through the new IP address.

If you are not familiar with the console command or the related parameter, enter "?" anytime in console to get the help description

5. Recovering Back to Default Configuration

IP address has been changed or admin password has been forgotten -

To reset the IP address to the default IP address "192.168.0.100" or reset the login password to default value, press the hardware-based reset button on the front panel for about 5 seconds. After the device is rebooted, you can log in to the management Web interface within the same subnet of 192.168.0.xx.
